-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-48 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 2-16, 19-30, 32, 34-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Bonnecaze et al (6579690). Bonnecaze discloses a blood analyte monitoring system substantially as claimed. The system comprises a monitoring device processor, a sensor adapted to provide an output signal as a function of an analyte in the user, a communication circuit, wherein the processor can calculate an amount of fluid to be infused into the users body, an infusion device comprising a drive mechanism in communication with the processor, the device is adapted to be carried on the exterior of the body of the user (Col. 55, lines 25-50, Col. 37, lines 5-25). The monitoring device is a blood glucose strip and the infusion device is an insulin pump (Col. 55, lines 5-25). The device comprises a transmitter and a receiver (Col. 44, lines 9-23). The device comprises a user input (Col. 44, lines 38-45).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 17, 18, 31, 33 rejected under 35 U.S.C. 103(a) as being unpatentable over Bonnecaze in view of Lebel et al (US2002/0019606). Claims 17, 8, 31, 33 differ from Bonnecaze in calling for a clock circuit to monitor date and time, and determine if a prescribed time period had elapsed. Lebel teaches a ambulatory medical apparatus including a clock circuit to display date and time and timestamps and historical data and profile start times that allow the user to monitor the relevant time periods in which the device is operating (Page 20, paragraph 0195, 0196). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Bonnecaze to include a clock circuit as taught by Lebel so that the user to monitor the relevant time periods in which the device is operating.

Response to Arguments

5. Applicant's arguments, see Pages 16-18, filed 9/5/06, with respect to the rejection(s) of claim(s) 2-48 under Lebel have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Bonnecaze as above.
